VelocityTravel API

Scalable Booking. Unified Travel.

A modern travel technology solution that connects agencies, OTAs, DMCs, and startups to real-time inventory, automated reservations, and seamless booking experiences — all through a single API.

What It Is

One API. Every Travel Service.

The Velocity Travel API is a unified platform connecting travel businesses with multiple suppliers — delivering real-time access to flights, hotels, transfers, sightseeing, and holiday packages.

Automate Reservations

Eliminate manual updates with instant booking confirmations.

Scale Seamlessly

Flexible architecture that grows with your booking volume.

Secure by Design

Encrypted transactions and reliable API communication.

Core Service

Flight Booking API

Search airline schedules, compare fares, retrieve seat availability, and process ticket bookings automatically — all in real time.

Live Fares

Instant fare updates from connected airline systems.

Itinerary Management

Full reservation lifecycle: book, modify, cancel.

Fast Workflows

Reliable airline inventory for faster customer bookings.

Core Service

Hotel Booking API

Offer thousands of hotels across multiple destinations through one platform — with real-time room availability, pricing, amenities, and instant booking confirmation.

Dynamic Search

Real-time hotel inventory with pricing, images, and descriptions.

Automated Reservations

Synchronize inventory and simplify cancellations automatically.

Global Coverage

Expand accommodation offerings without separate supplier connections.

Higher Conversions

Improved user experience drives more completed bookings.

Core Service

Transfers, Sightseeing & Holiday Packages

Beyond flights and hotels, VelocityTravel API covers the full travel journey — from airport transfers to curated holiday packages.

Transfer API

Airport transfers, city transportation, vehicle booking, and real-time availability.

Sightseeing Integration

Activities and tours with pricing, availability, and instant booking.

Holiday Packages

Customizable travel packages with destination details and itinerary management.

Platform Solution

White Label Travel Portal

Launch a fully branded travel booking website without building technology from scratch. Integrate flights, hotels, transfers, and packages into a customized platform — and focus on growth, not code.

🚀 Faster Launch

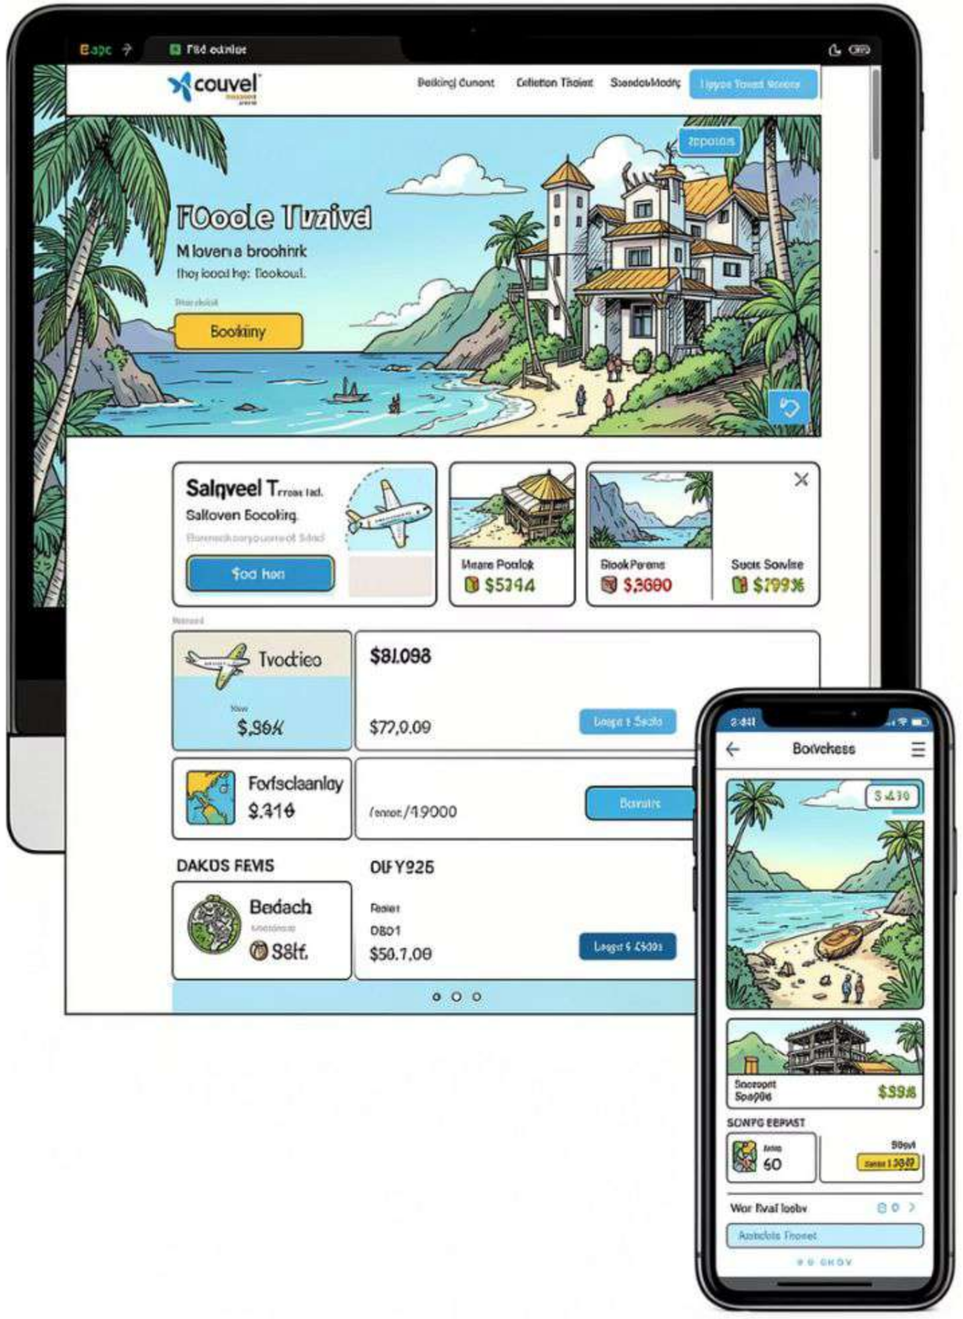
Reduce development time with pre-built booking infrastructure.

🎨 Full Brand Control

Maintain complete brand identity across the booking experience.

💳 Secure Payments

Integrated payment processing with automated reservation management.



Why It Matters

Key Benefits

Real-Time Inventory

Instant access to updated flights, hotels, and transfers — customers always see accurate availability.

Faster Automation

Automate search, pricing, booking, and cancellations — reducing manual work and errors.

Multi-Supplier Connectivity

Connect with multiple travel suppliers through one integration, simplifying inventory management.

Scalable Growth

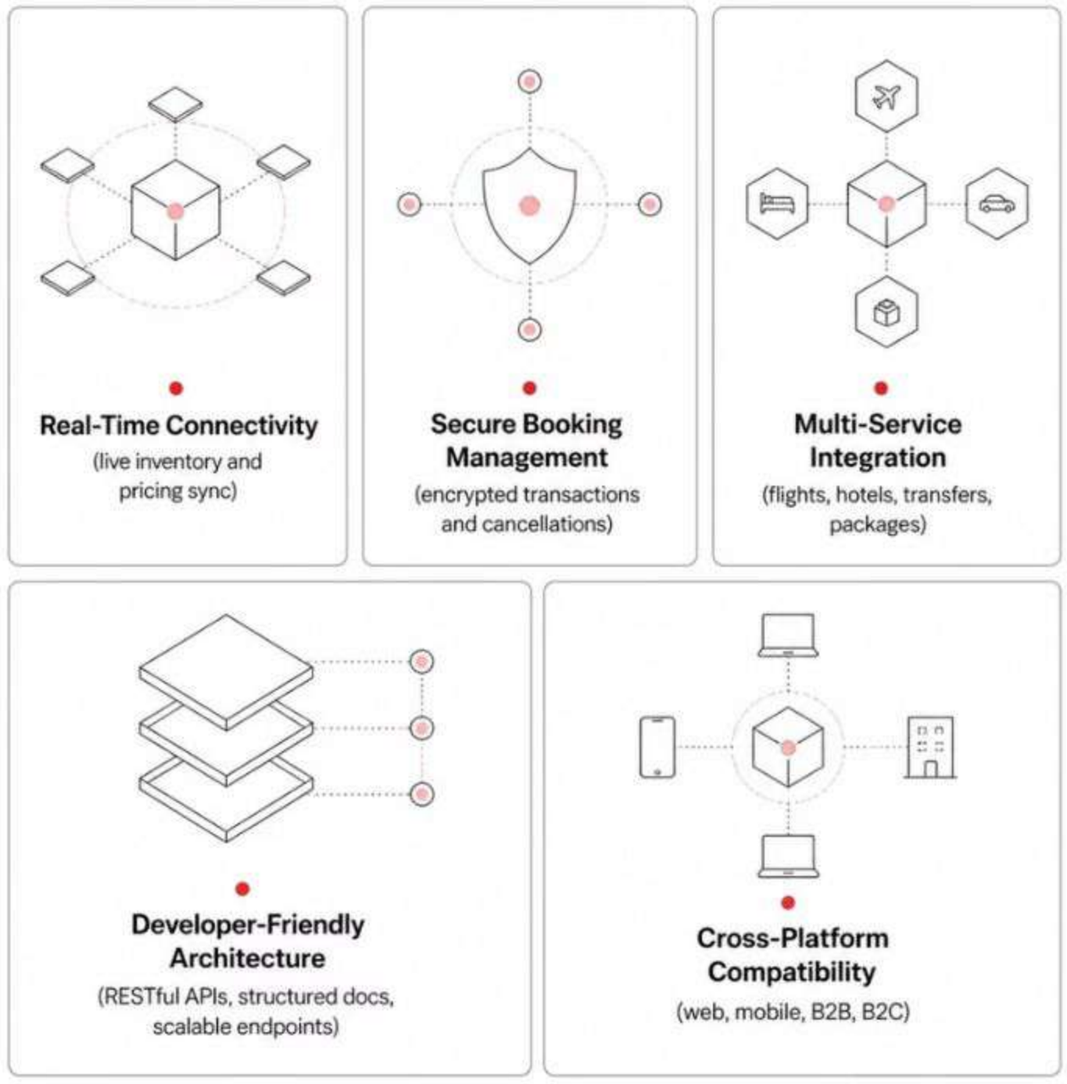
Flexible integration and higher booking capacity without disrupting existing operations.

Improved Experience

Fast search results, secure reservations, and instant confirmations create a smooth booking journey.

Technical Edge

Features Built for Developers



VelocityTravel API is engineered for rapid, reliable integration — with RESTful endpoints, structured documentation, and cross-platform support that works across web apps, mobile apps, and B2B portals.

One API infrastructure powers every channel: web, mobile, B2B, and B2C booking platforms.

Getting Started

Package Options

Starter Integration

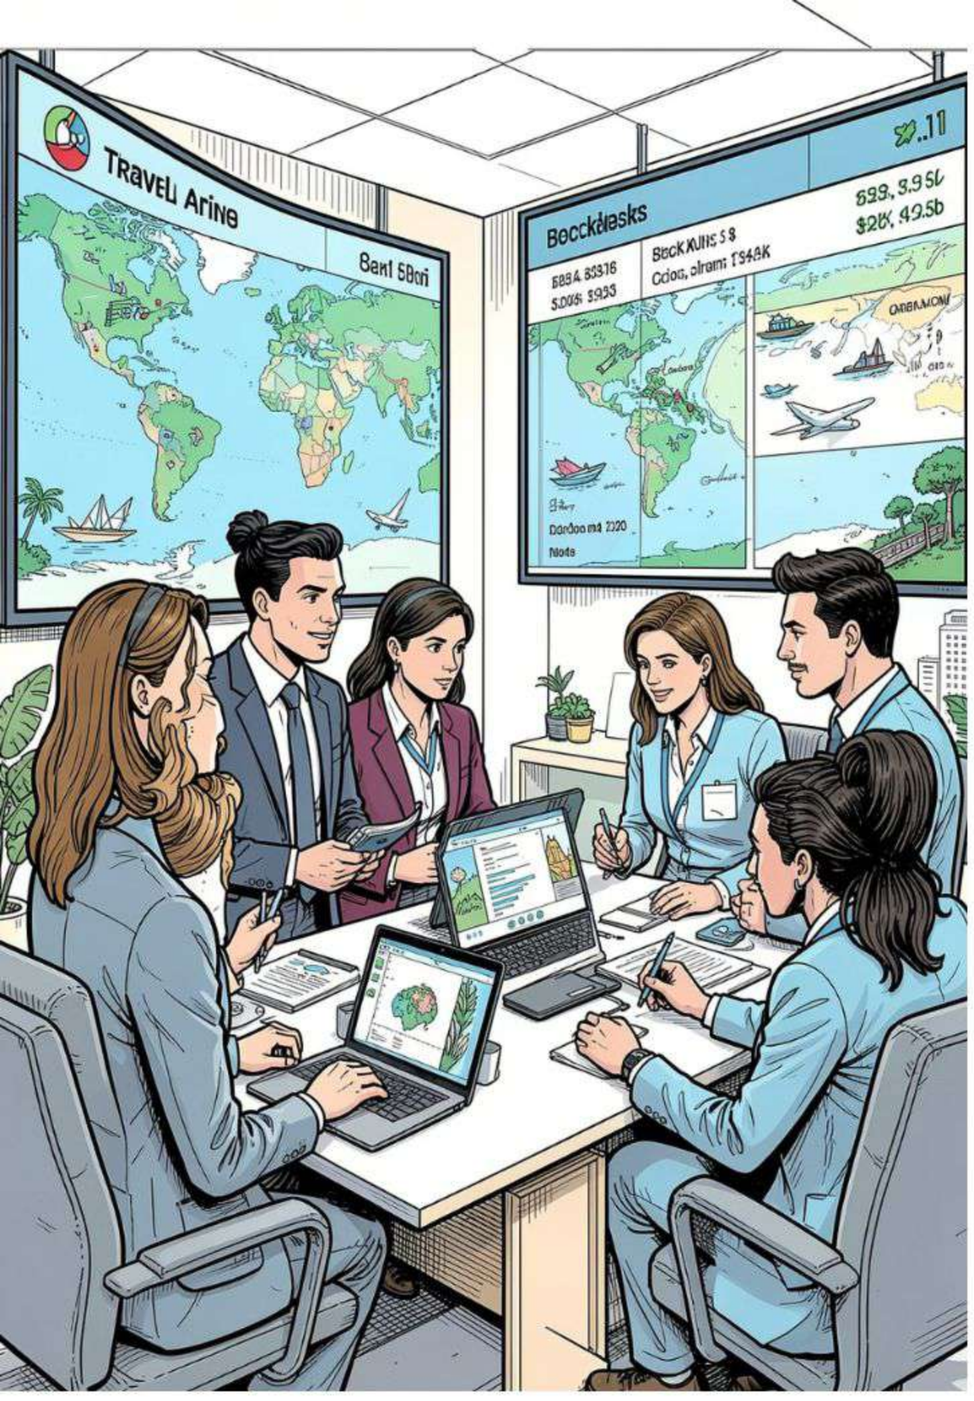
Essential API connectivity, developer docs, testing environment, and basic booking features. Ideal for startups building a reliable travel tech foundation.

Business Growth

Multiple travel services, advanced API functionality, enhanced supplier connectivity, booking automation, and priority implementation support.

Enterprise Solution

Complete deployment with customized integration, enterprise-grade security, dedicated support, scalable infrastructure, and advanced reporting for high-volume platforms.



Build the Future of Travel

Whether launching a new portal or scaling an existing platform, VelocityTravel API delivers the flexibility, performance, and reliability to build competitive, future-ready travel solutions.

Unified Platform

Flights, hotels, transfers, and packages through one API.

Scalable Architecture

Grows with your business — no operational disruption.

Developer-Ready

RESTful APIs, clear docs, and fast integration.
